La alternativa rápida a los discos duros.

Experimente un nuevo nivel de respuesta y protección de datos en su PC con Intel® Solid-State Drive 320 Series.

intel.com/go/ssd

- Más capacidad de respuesta que los discos duros tradicionales y una mejor experiencia informática general.
- Al no contar con partes móviles se reduce el riesgo de pérdida de datos en caso de caídas o golpes.
- La calidad y confiabilidad que usted espera de Intel, el fabricante líder en tecnología de procesadores para PC.
- Basado en la innovadora tecnología líder Flash de 25 nm.
- Consume menos energía que un disco duro tradicional para que usted pueda mantenerse conectado por más tiempo.

Presentamos la nueva Back-UPS de APC,

APC
by Schneider Electric

reinventada pensando en su negocio.

Back-UPS de APC protege su productividad durante caídas de tensión, sobretensiones y cortes en el suministro.

APC
Legendary
Reliability

Protección garantizada en dos niveles

Hace años que usted confía en Back-UPS de APC para proteger sus computadoras y datos contra la amenaza de un suministro irregular o impredecible. ¿Pero sabía que la clase de protección que ofrece cada unidad Back-UPS de APC le brinda tranquilidad en dos niveles? Por un lado, las tomas de salida con protección contra sobretensiones integrada protege sus equipos y archivos valiosos ante sobretensiones transitorias y prolongadas que se propagan por las líneas de los servicios eléctricos. Por el otro, si se produce una interrupción en el suministro, la unidad Back-UPS le garantiza que contará con suficiente tiempo de autonomía con alimentación a batería para terminar lo que está haciendo y apagar los sistemas en forma segura, de modo que pueda proteger sus valiosos datos.

Características avanzadas para maximizar la vida útil de la batería

El diseño eléctrico y de los inversores de la unidad Back-UPS es sumamente eficiente, lo que prolonga la duración de la batería cuando se interrumpe el suministro. Además, las características especiales le permiten preservar la batería para cuando usted más la necesita. Varios modelos ofrecen la función de regulación automática de tensión (AVR), que corrige de inmediato, y sin recurrir a la batería, las condiciones de baja o alta tensión que se experimentan cuando el suministro es inestable. Y la posibilidad de ajustar la sensibilidad para la tensión de transferencia le permite personalizar los valores en función de los cuales la unidad Back-UPS transferirá la carga a la batería; así se evita que la unidad funcione en modo de alimentación a batería innecesariamente. No permita que un suministro inestable ponga en riesgo su negocio. Con Back-UPS de APC puede contar con confiabilidad garantizada y características innovadoras que le permitirán seguir en marcha.

Soluciones Eficientes de Energía para Cada Nivel de Protección:

Back-UPS® ES 750G

Serie Back-UPS Pro: UPS de alto rendimiento

Las unidades Back-UPS Pro de alto rendimiento ofrecen características para ahorro de costos y proporcionan altos niveles de eficiencia energética. Las tomas de salida con capacidad de ahorro de energía desconectan la alimentación a dispositivos que no se están usando cuando el usuario apaga la computadora y los periféricos o los pasa al modo de reserva.

BR 550G

- 6 tomas de salida
- 45 minutos de autonomía máxima
- 3 Minutos de tiempo de respaldo a carga completa
- 10 Minutos de tiempo de respaldo a media carga

La Eficiencia Energética del BR700G

La Eficiencia energética del BR700G ofrece una pantalla LED de fácil lectura y una variedad de características que permiten el ahorro de energía - como las "Salidas Maestras Controladas" que permiten apagar periféricos inactivos cuando la computadora está apagada o en modo "sleep".

- 6 tomacorrientes
- 75 minutos de tiempo de respaldo total
- 3 minutos de tiempo de respaldo a carga completa
- 12 minutos de tiempo de respaldo a media carga
- Protección para líneas de teléfono, red y cables coaxiales
